

▲ Chinese porcelain

### Excavated articles

Excavated articles includes various kinds of things: Chinese fine porcelains, such as celadon and white porcelain, Katsuyu pottery, Gusuku earthenware, Ruisue pottery, old coins, iron nails, iron arrowheads, carbonized wheat and rice, and animal and fish bones. A major portion of the excavated articles are Chinese porcelains of the 15th and 16th Centuries. It is believed that these items continued to be used even after Gosamaru moved to Nakagusuku in 1440.
